Lock Options

There are a wide variety of lock options to choose from, with varying features and locker compatibility. **To discuss which locks would best suit your needs and your locker of preference, contact your local sales representative.**

Pad-latch

Pad-latches offer flexible security by allowing users to apply their own padlocks. This is a cost-effective and user-controlled option for shared spaces.

Keylock

The Keylock is a simple, reliable key-based locking mechanism. It's easy to use and integrates seamlessly into standard locker designs, offering basic security for personal or workplace storage.

Mechanical Combination Lock

Digital Combination Locks provides keyless entry with programmable number codes, making it a secure and convenient choice for shared or high-turnover environments.

Push Button Digital Lock

Push Button Locks use mechanical or electronic buttons for PIN entry and are known for quick access without batteries or external power.

Touch Pad Digital Lock

Touch pad digital locks feature sleek, illuminated keypads that support PIN entry. They offer a modern aesthetic and are well-suited to environments needing intuitive and secure access.

RFID Lock

RFID locks provide contactless access using swipe cards and are perfect for streamlined user management. They integrate with access control systems for centralised security and audit tracking.

Touch Pad & RFID Lock

These hybrid locks combine the flexibility of a keypad with the speed of RFID access with dual authentication options. Ideal for tech-forward environments with advanced access control protocols.

Padlock

Padlocks are an affordable and versatile option for lockers with padlatch fittings. Users maintain their own keys or combinations, making them well-suited for temporary or casual use.

Coin Operated Lock

Coin operated locks are perfect for public or shared facilities like gyms and aquatic centres, offering temporary use with a refundable coin or an option to charge users and retain the coin.

Smart Lock System

Steelco Smart Locker Systems deliver secure, adaptable storage with advanced electronic locking technology. Designed to streamline storage management, these lockers offer flexible access options, real-time usage tracking, and seamless integration with your workplace or public environment. Ideal for parcel management, personal storage, and shared asset control, Steelco Smart Lockers deliver efficiency without compromising on durability or style.

Certifications and Sustainability Features

100% Recyclable Steel

This product uses steel that is 100% recyclable at the end of its lifespan. Every steel component can be processed through recycling systems to be reused. This reduces landfill waste and supports clients in meeting green building and environmental certification targets.

Australian Trusted Trader

The supplier is an accredited Australian Trusted Trader, recognised by the Australian Government for our secure and compliant international trade operations. This accreditation signifies their commitment to ethical sourcing, customs compliance, and risk management alowing them to build stronger partnerships and deliver more efficient, transparent supply chains.

APCO

The supplier is a member of the Australian Packaging Covenant Organisation. They are committed to reducing the environmental impact of their packaging. They use packaging that prioritises recyclability, and avoids excess plastic and other materials.

Sedex

The supplier is a registered supplier in the Sedex Ethical Sourcing Platform. They are committed to improving ethical, social and environmental standards at every step of their supply chain. **Reference No. ZC1011847**

ISO 9001:2015 – Quality Management System

The supplier has a Quality Management System (QMS) that focuses on continuous improvement in customer service to our clients, including the delivery of quality products and services that are manufactured and provided to the highest industry standards. By following their QMS they are able to control the quality of all products that we distribute regardless if they are custom one-offs or our standard range.

ISO 14001:2015 – Environmental Management System

The supplier's Environmental Management System (EMS) gives us the ability to identify better allocations of our "resource, waste and energy management" minimising our environmental footprint. The focus on providing an eco-friendly environment has significantly reduced our environmental impact and subsequently our entire networks impact, with the hope that it continues to reduce going forward into the future.

ISO 45001:2018 – Occupational Health & Safety

The supplier has adopted international best practices in their systematic approach to health and safety management, by focusing on a proactive approach rather than reactive controls. From this structure it is easy to see that we have a rigorous OHS policy and management system in place to protect the health and safety of our employees and visitors at all facilities and sites.

Product Stewardship

The supplier embraces product stewardship by taking responsibility for the entire lifecycle of their products, from design and manufacturing to use and end-of-life. They implement take-back schemes, offer recycling support, and partner with industry programmes to ensure products are disposed of sustainably. This commitment reduces landfill waste and promotes responsible resource use.
